## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 6-7 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reinbolt in view of Stein. Reinbolt discloses all of the limitations of the invention except for a resistance control element to vary the resistance of the tube. Thus, Stein, an analogous art, teaches in paragraph [0087] a resistance element that can be varied. It would have been obvious to one having ordinary skill in the art at the time the invention was made to vary the resistance in order to increase the flexibility of the exercise to the user.
